

Solution for "This app can't open"

This app can't open

Microsoft Edge can't be opened using the Built-in Administrator account. Sign in with a different account and try again.

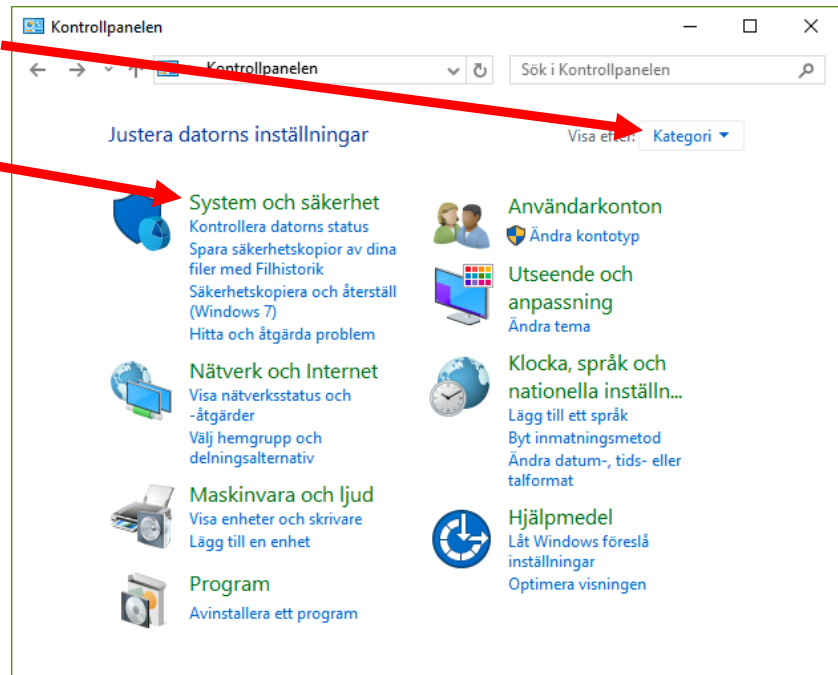

Close

1. Right-click on the start menu (the Windows flag).
2. Click on **Control panel**.

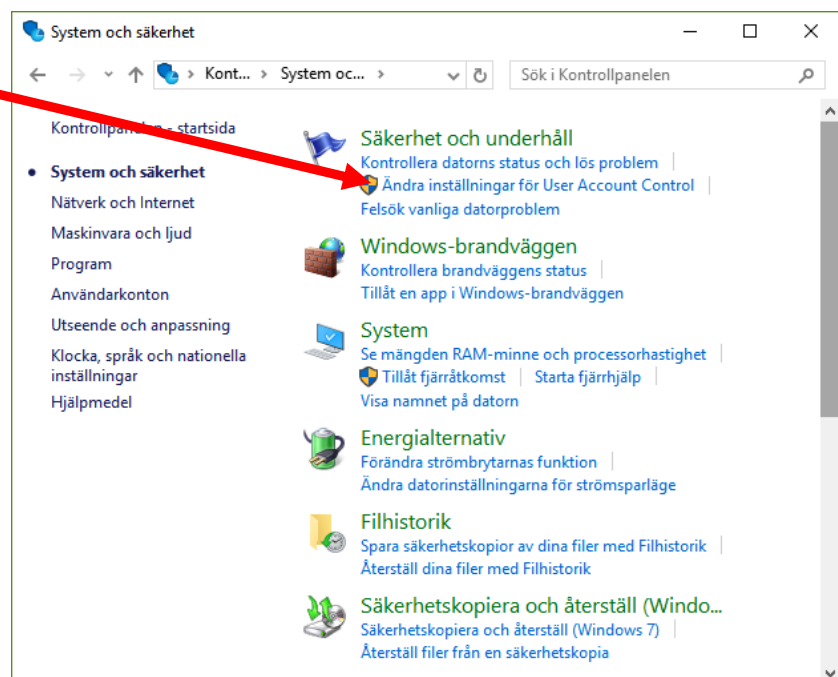

3. Change **View by** to **Category**.

4. Click on **System and Security**.

5. Click on **Change User Account Control settings**.

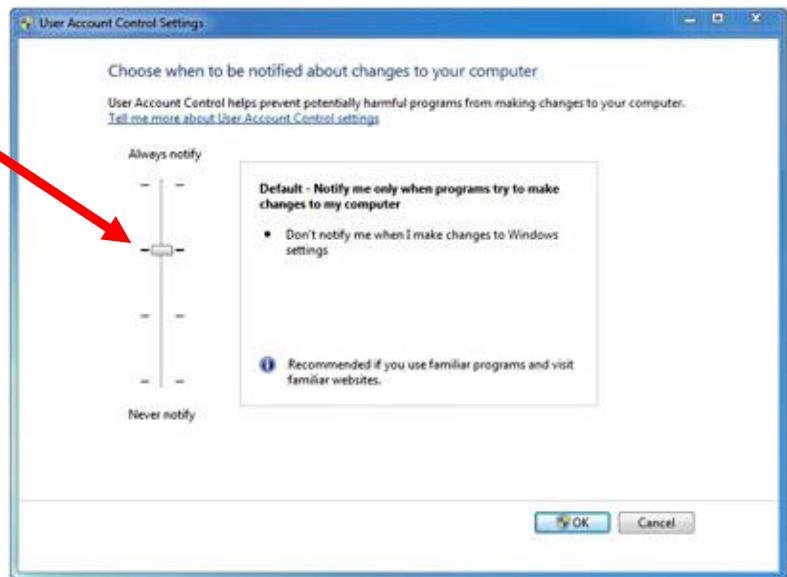

6. Pull the control to the next highest level (default).

7. Click on **OK**.

8. Restart your computer.

*Because of the option for **fast startup**, it might not have the same effect if you turn of and restart the computer manually.*

9. If you get a runtime-error, right-click the program icon and select **Run as Administrator**.
